## Experience

### Deeplocal                                                    2021 – present
Senior Creative Technologist

- Building interactive experiences for companies such as Google, General Mills, and Facebook.
- Assisting in concepting, pitching, and creative direction.

### Parsons University                                           2021 – present
Part Time Faculty

- Teaching Critical Computation lab, an introduction to computation as an expressive medium.

### Urban Front                                                  2019 – 2021
Lead Creative Technologist

- Worked alongside a group of designers to build and implement large, interactive installations in museums highlighting issues around architecture and urban development.
- Designed and built installations for the Chicago Architecture Biennial (2019) and the Venice Architecture Biennale (2021).

### Parsons University                                           2019
Teaching Fellow

- Structured and taught a course on code as creative as creative medium to incoming graduate students in the Design and Technology program.

### Self-Employed                                                2018 – 2021
Artist and Research Assistant

- Worked with different artists to incorporate technology into their processes or final work.
- Selected projects include: using a pen plotter with a fiber-optic cable to write with light on photo-negative prints, and manipulating real-time radio wave data projected onto sculptural forms.

### Kettle                                                       2013 – 2018
Front End Developer

- Specialized in building out highly interactive and animation intensive websites.
- Front-end development for clients including Apple, New Museum, and Penguin, among others.

## Education

### Parsons School of Design                                     2018 – 2021
MFA, Design and Technology

### Sarah Lawrence College                                       2008 – 2012
BA, Mathematics and Studio Art
